

# PROJECT SUMMARY

Eagle Bay Refrigeration goes beyond the equipment. We're a dedicated partner with 30+ years of industry experience here to assist you throughout the entire project to ensure best results. Some of the capabilities and services we typically provide are summarized below.

## STEP 1

### PROJECT PLANNING

- Review **your existing system** for reliability & functionality
- Discuss **future plans/ expansions**
- Obtain **input from the entire team** involved

## STEP 2

### EQUIPMENT CONFIGURATION/ OPTIONS

- Configure equipment for **reliability, easy maintenance, & value**
- Provide multiple options to meet project requirements
- Assess areas to **increase efficiency/ decrease energy use** (compressor selection, adiabatic cooling, free-cooling, heat recovery, etc.)
- Sustainability review: **natural/ low GWP options, incentives/ funding** to help pay for sustainable projects

For inquiries please call (315) 320-6385

### STEP 3

#### ORDERING EQUIPMENT

-EBR will **coordinate all aspects of equipment manufacturing and delivery** to ensure the equipment is built properly, factory tested, and delivered on time

### STEP 4

#### INSTALLATION

-EBR will schedule on-site visits as necessary to **handle any questions or issues during equipment installation**

### STEP 5

#### COMMISSION/ TRAINING (upon request)

-Installation, operating, and maintenance instructions provided, including recommended stocking list and preventative maintenance

-**On-site and remote training sessions** available to review all areas of equipment operation and maintenance

-EBR will work with the end-user and installation contractor to **commission equipment during/ after installation**

### STEP 6

#### FOLLOW-UP

-We are an **ongoing resource to be consulted** as facility and process needs change, supporting the equipment with on-site review of any operational or maintenance items
